ПвЭогаП-35 3х150 ТУ У 31.3-00214534-017-2003

Three-core power cables with copper conductors, with XLPE, collective screen, with longitudinal and transverse sealing and polyethylene outer sheath

Technical cable requirements correspond to IEC 60502-2

Cables are used for laying:

- in soil (trenches)
- in damp, partially flooded premises
- in ground with high humidity
- in non-navigable waters
- in the air, including cable structures, if provided the additional fire protection

It is possible to manufacture cables with extruded semiconductor layer along outer sheath. Order entry example:

ПвЭогаП-П-35 3х150/50 ТУ У 31.3-00214534-017-2003

An extruded semiconductor layer along outer sheath ensures the correct testing of cable line with sections of underground laying in polymer pipes.

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

ПвЭогаП-35 3х150/50 (ОМ) ТУ У 31.3-00214534-017-2003

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

It is possible to manufacture cable with sealed conductors. Order entry example: Π B \Im ora Π -35 3x150/50 (r) TY Y 31.3-00214534-017-2003
