# ПвЭБВнгд-6 3х240 ТУ У 31.3-00214534-017-2003

Three-core power cables with copper conductors, flame-retardant, with XLPE, steel-tape armoured, with PVC compound outer sheath and with low smoke and gas emission

For the cable of this mark correspond the foreign-made analogues:

ПвБВнг(B)-LS (RU) • ПвБВнг(A)-LS (RU)

Technical cable requirements correspond to IEC 60502-2

Cables are used for laying:

- · in places, where mechanical impacts on cable are possible, except tensile forces
- in premises, tunnels, ducts, mines, dry soil and outdoor under shelter
- · in bunches
- at sites, where low smoke and gas emission are required (NPP, subway, large industrial facilities, high-rise buildings, etc.)

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

ПвЭБВнгд-6 3х240/25 (ОМ) ТУ У 31.3-00214534-017-2003

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

It is possible to manufacture cable with sealed conductors.

Order entry example:

ПвЭБВнгд-6 3х240/25 (г) ТУ У 31.3-00214534-017-2003

Fire safety code in accordance with ДСТУ 4809:2007: ПБ122121000

Products of this mark meet the requirements:

- · single wire cable flame retardance
- bunched cable flame retardance category A
- toxicity class Tk2 of the combustion products of nonmetallic elements (toxicity index from 40 up to 120 g/m³)
- class  $\pred{\mathcal{J}}$ T $\kappa$ 1 on smoke-forming ability by smouldering of non-metallic elements (coefficient of smoke formation from 50 to 500 m²/kg)
- class ДПк2 on smoke-forming ability by combustion (minimum luminous flux more than 60 %)
- corrosive class  $K\kappa 1$  of combustion products of non-metallic elements (the number of halogen hydrides less than 150 mg/g, pH less than 4.3, specific conductivity more than 10  $\mu$ S/mm)

Three-core power cables with copper conductors, flame-retardant, with XLPE, steel-tape armoured, with PVC compound outer sheath and with low smoke and gas emission

### **TECHNICAL SPECIFICATIONS**

| Rated voltage   | kV    | 6                    |
|---|-------|----------------------|
| Maximum voltage   | kV    | 7.2                  |
| Number and rated area of conductors                         | mm²   | 3 x 240              |
| Insulation thikness   | mm    | 2.6                  |
| Minimum screen cross-section                                | mm²   | 25                   |
| Permissible short circuit current across the screen of      | kA    | 5.1                  |
| minimum cross-section                                       |       |                      |
| Maximum permissible short-circuit current in core           | kA    | 34.3                 |
| Permissible continious current rating *                     |       |                      |
| by aerial laying  | Α     | 529                  |
| • by burial   | Α     | 431                  |
| Partial discharge factor for rated voltage, not more than   | рС    | 6                    |
| Maximum permissible conductor temperature                   |       |                      |
| Continious  | ° C   | +90                  |
| in emergency operation                                      | ° C   | +130                 |
| at short circuit  | ° C   | +250                 |
| Operating temperature range (in climate version NF)         | ° C   | -50 +50              |
| Operating temperature range (in climate version T)          | ° C   | -25 +65              |
| Minimum bending radius by laying                            | mm    | 1184                 |
| Rated outer diameter of the cable (for reference) **        | mm    | 74                   |
| Cable weight (approximate)                                  | kg/km | 12190                |
| Rated factory cable length and gross weight of the delivery | m, t  | # 22УД-60: 319 • 4.8 |
| on the drums  |       | # 25УД-90: 583 • 8.7 |
| Notae   |       |                      |

#### Notes:

When ordering it is neccesary to agree the factory length of the product with the manufacturer

<sup>\*</sup> Long permissible current loads are calculated for the following conditions: conductor temperature 90 °C, air temperature 30 °C, soil temperature 20 °C, load factor 1.0, thermal resistivity of soil 1.5 °K • m/W, laying depth in the ground 0.8 m, shields are grounded at both ends of the line

<sup>\*\*</sup> The external diameter may differ from the rated up to  $\pm$  10 %

# ПвЭБВнгд-6 3х240 ТУ У 31.3-00214534-017-2003

Three-core power cables with copper conductors, flame-retardant, with XLPE, steel-tape armoured, with PVC compound outer sheath and with low smoke and gas emission

### **CONSTRUCTION**

- 1. Copper multiwire compact conductor
- 2. Inner extruded semiconducting layer
- 3. XLPE insulation
- 4. Outer extruded semiconducting layer
- 5. Lapping layer of semiconductive swellable tape
- Copper screen

Note: It is possible to manufacture a cable with a fiber optic module built into the screen, including as a DTS system sensor

- 7. Extruded filling of low fire-risk PVC compound
- 8. Double galvanized steel-tape armour
- 9. Low fire-risk PVC compound outer sheath

Note: Conductor twisting is not illustrated
