# ВКбШв 2х6-1 ТУ У 31.3-00214534-057:2007

Power cables with copper conductors, with PVC-compound insulation, galvanized steel-wire armoured, with PVC-compound protection hose

Cables are used for laying:

- single laying
- · in premises, dry ducts and tunnels, in corrosive environment
- in places, where small mechanical impacts on cable are possible, including tensile forces

It is possible manufacturing of cables in cold-resistant performance (ВКбШв-ХЛ)

Fire safety code in accordance with ДСТУ 4809:2007: ПБ10000000

Products of this mark meet the requirements:

single wire cable flame retardance

### **TECHNICAL SPECIFICATIONS**

| Rated voltage                                                      | kV    | 1                |
|--------------------------------------------------------------------|-------|------------------|
| Number and rated area of conductors                                | mm²   | 2 x 6            |
| Phase insulation thikness                                          | mm    | 1                |
| Armor wire diameter                                                | mm    | 0.3              |
| Permissible continious current rating (AC of industrial frequency) | *     |                  |
| • by aerial laying                                                 | А     | 46               |
| • by burial                                                        | А     | 59               |
| Maximum permissible conductor temperature                          |       |                  |
| Continious                                                         | °C    | +70              |
| in emergency operation                                             | °C    | +80              |
| at short circuit                                                   | °C    | +160             |
| Operating temperature range                                        | °C    | -50 +50          |
| Minimum bending radius by laying                                   | mm    | 112.5            |
| Rated outer diameter of the cable (for reference) **               | mm    | 15               |

| Rated factory cable length and gross weight of the delivery        | m, t  | # 12: 1450 · 0.6 |
| on the drums ***                                                   |       |                  |
| N .                                                                |       |                  |

Notes:

When ordering it is neccesary to agree the factory length of the product with the manufacturer

\* Long permissible current loads are calculated for the following conditions: air temperature plus 25 °C, soil temperature plus 15 °C,

thermal resistivity of soil 1.2  $\% \cdot$ m/W, laying depth in the soil 0.7 m

\*\* The external diameter may differ from the rated up to  $\pm$  10 %

# ВКбШв 2x6-1 ТУ У 31.3-00214534-057:2007

Power cables with copper conductors, with PVC-compound insulation, galvanized steel-wire armoured, with PVC-compound protection hose

### CONSTRUCTION

- 1. Copper conductor
- 2. PVC compound insulation
- 3. PET film winding
- 4. PVC compound belt insulation
- 5. Round galvanized steel-wire armour
- 6. Pressed PVC compound protection hose

Note: Conductor twisting is not illustrated
