## 

Single-core self-supporting high-voltage flame-retardant wires with polymer compound insulation

Used for laying:

aerial electric power lines for the rated voltage from 10 kV till 35 kV

• in air, types II and III according to FOCT 15150-69, including on sea coasts, salt lakes, in industrial areas and areas of saline sands

It is possible to manufacture the wire with longitudinal core sealing by water-blocking materials

Fire safety code in accordance with ДСТУ 4809:2007: ПБ10000000

Products of this mark meet the requirements:

single wire cable flame retardance

#### **TECHNICAL SPECIFICATIONS**

| Rated voltage  | kV    | 35                |
|--|-------|-------------------|
| Number and rated area of phase conductors                      | mm²   | 1 x 185           |
| Phase insulation thikness                                      | mm    | 3.5               |
| Current ratings *  |       |                   |
| Continious   | А     | 600               |
| at short circuit (not more than 1 s)                           | kA    | 15.9              |
| Maximum permissible conductor temperature                      |       |                   |
| Continious   | °C    | +90               |
| • at short circuit (not more than 5 s)                         | °C    | +250              |
| Operating temperature range                                    | °C    | -60 +50           |
| Permissible temperature of laying (installation), no less than | °C    | -20               |
| Minimum bending radius by laying                               | mm    | 230               |
| Rated outer diameter of the cable (for reference) **           | mm    | 23                |
| Weight (approximate)   | kg/km | 710               |
| Rated factory cable length and gross weight of the delivery    | m, t  | # 16a: 1760 • 1.5 |
| on the drums ***   |       | # 18: 2010 • 1.9  |
|  |       | # 20: 3210 • 2.9  |
| Nataa  |       |                   |

Notes:

When ordering it is neccesary to agree the factory length of the product with the manufacturer

\* Long permissible current loads are calculated for the following conditions: ambient temperature plus 25 °C, wind speed 0.6 m/s, the intensity of solar radiation 1000 W/m<sup>2</sup>

\*\* The external diameter may differ from the rated up to  $\pm$  10 %
