Wires with PVC-plastic insulation in varnished braiding for onboard circuit

Used:

· for fixed installation of electric network, including aviation equipment

The wires are resistant to vibration, impact and linear loads, to acoustic noise, to relative humidity of air up to 98% at a temperature of 40 °C, low pressure to 67 Pa and increased pressure to 3 atm., as well as to influence of oil and gasoline

TECHNICAL SPECIFICATIONS

| Rated AC voltage up to 2000 Hz | V | 250 |
|---|-------|---------|
| Rated DC voltage | V | 500 |
| Number and rated diameter of conductors | mm² | 1 x 25 |
| Class of core flexibility | | 4 |
| Ambient operating temperature | °C | -60 +50 |
| Permissible continious conductors temperature | °C | +70 |
| Minimum bending radius by laying | mm | 224 |
| Cable outer diameter (for reference only) ** | mm | 11.2 |
| Cable weight (approximate) | kg/km | 300.1 |
| Minimal service life | years | 15 |
| Notes: | | |

When ordering it is neccesary to agree the factory length of the product with the manufacturer

 ** The external diameter may differ from the rated up to \pm 10 %

CONSTRUCTION

- 1. Tin coated copper multiwire current-carrying conductor
- 2. PVC compound insulation
- 3. Braid made of cotton or combined yarn, laquered
- 4. Screen tinned copper wires braid
