

## **АПвЭгаПнг-20 3x300 ТУ У 31.3-00214534-058:2007**

Power cables with aluminium conductors, flame-retardant, with XLPE, longitudinal and transverse screen sealing and polymer compound outer sheath

---

Technical cable requirements correspond to IEC 60502-2

Cables are used for laying:

- *in premises, tunnels, ducts, mines, dry soil and outdoor under shelter*
- *single laying*

---

It is possible to manufacture cables with extruded semiconductor layer along outer sheath.

Order entry example:

АПвЭгаПнг-П-20 3x300/25 ТУ У 31.3-00214534-058:2007

An extruded semiconductor layer along outer sheath ensures the correct testing of cable line with sections of underground laying in polymer pipes.

---

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

АПвЭгаПнг-20 3x300/25 (ОМ) ТУ У 31.3-00214534-058:2007

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

---

It is possible to manufacture cable with sealed conductors.

Order entry example:

АПвЭгаПнг-20 3x300/25 (Г) ТУ У 31.3-00214534-058:2007

---

It is possible manufacturing of cables in versions (A) and (B), flame-retardant when laying in bunches

---

Fire safety code in accordance with ДСТУ 4809:2007: ПБ101122000

Products of this mark meet the requirements:

- *single wire cable flame retardance*
- *toxicity class Tk1 of the combustion products of nonmetallic elements (toxicity index from 13 up to 40 g/m<sup>3</sup>)*
- *class ДТк1 on smoke-forming ability by smouldering of non-metallic elements (coefficient of smoke formation from 50 to 500 m<sup>2</sup>/kg)*
- *class ДПк2 on smoke-forming ability by combustion (minimum luminous flux more than 60 %)*
- *corrosive class Kк2 of combustion products of non-metallic elements (the number of halogen hydrides less than 150 mg/g, pH more than 4.3, specific conductivity less than 10 μS/mm)*

## АПвЭгаПнг-20 3x300 ТУ У 31.3-00214534-058:2007

Power cables with aluminium conductors, flame-retardant, with XLPE, longitudinal and transverse screen sealing and polymer compound outer sheath

### TECHNICAL SPECIFICATIONS

Rated voltage	kV	20
Maximum voltage	kV	24
Number and rated area of conductors	mm <sup>2</sup>	3 x 300
Insulation thickness	mm	5.5
Minimum screen cross-section	mm <sup>2</sup>	25
Permissible short circuit current across the screen of minimum cross-section	kA	5.1
Maximum permissible short-circuit current in core	kA	28.2
Permissible continuous current rating *		
• by aerial laying	A	475
• by burial	A	384
Partial discharge factor for rated voltage, not more than	pC	6
Maximum permissible conductor temperature		
• Continuous	°C	+90
• in emergency operation	°C	+130
• at short circuit	°C	+250
Operating temperature range	°C	-60 ... +50
Minimum bending radius by laying	mm	1440
Rated outer diameter of the cable (for reference) **	mm	90
Cable weight (approximate)	kg/km	9180
Rated factory cable length and gross weight of the delivery on the drums	m, t	# 25УД-90: 396 • 5.2 # 26УД-100: 457 • 6.0 # 30УД-130: ***778 • 10.0

#### Notes:

When ordering it is necessary to agree the factory length of the product with the manufacturer

\* Long permissible current loads are calculated for the following conditions: conductor temperature 90 °C, air temperature 30 °C, soil temperature 20 °C, load factor 1.0, thermal resistivity of soil 1.5 °K·m/W, laying depth in the ground 0.8 m, shields are grounded at both ends of the line

\*\* The external diameter may differ from the rated up to ± 10 %

\*\*\* Option delivery on not full drum

## АПвЭгаПнг-20 3x300 ТУ У 31.3-00214534-058:2007

Power cables with aluminium conductors, flame-retardant, with XLPE, longitudinal and transverse screen sealing and polymer compound outer sheath

### CONSTRUCTION

1. Central polyethylene bundle

2. Aluminium multiwire compacted conductor

*Note: It is possible to manufacture cable with sealed conductors.*

3. Inner extruded semiconducting layer

4. XLPE insulation

5. Outer extruded semiconducting layer

6. Lapping layer of semiconductive swellable tape

7. Copper screen

*Note: It is possible to manufacture a cable with a fiber optic module built into the screen, including as a DTS system sensor*

8. Extruded filling of PVC compound

9. Alumopolymer tape

10. Flame-retardant polymer compound outer sheath

*Note: It is possible to manufacture cable with extruded semiconductor layer along outer sheath*

*Note: Conductor twisting is not illustrated*
