

## **АПвЕАкВ-10 1х35** **ТУ У 31.3-00214534-017-2003**

Single-core power cables with aluminium conductor, with XLPE, aluminium-wire armoured, with PVC compound outer sheath

For the cable of this mark correspond the foreign-made analogues:

Al/XLPE/CWS/PVC/AWA/PVC (GB) • YHAKXSAx (PL)

Due to non-magnetic armour, cables operate at AC

Technical cable requirements correspond to IEC 60502-2

Cables are used for laying:

- *in places, where small mechanical impacts on cable are possible, including tensile forces*
- *in premises, tunnels, ducts, mines, dry soil and outdoor under shelter*
- *single laying*

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

АПвЕАкВ-10 1х35/16 (ОМ) ТУ У 31.3-00214534-017-2003

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

It is possible to manufacture cable with

Order entry example:

АПвЕАкВ-10 1х35/16 (ожк) ТУ У 31.3-00214534-017-2003

It is possible to manufacture cable with sealed conductor.

Order entry example:

АПвЕАкВ-10 1х35/16 (г) ТУ У 31.3-00214534-017-2003

It is possible to supply of three stranded single-core cables.

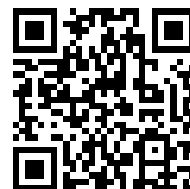

Order entry example:

3хАПвЕАкВ-10 1х35/16 ТУ У 31.3-00214534-017-2003

Fire safety code in accordance with ДСТУ 4809:2007: ПБ100000000

Products of this mark meet the requirements:

- *single wire cable flame retardance*

## АПвЕАкВ-10 1х35 ТУ У 31.3-00214534-017-2003

Single-core power cables with aluminium conductor, with XLPE, aluminium-wire armoured, with PVC compound outer sheath

### TECHNICAL SPECIFICATIONS

Rated voltage	kV	10
Maximum voltage	kV	12
Number and rated area of conductors	mm <sup>2</sup>	1 x 35
Insulation thickness	mm	3.4
Minimum screen cross-section	mm <sup>2</sup>	16
Permissible short circuit current across the screen of minimum cross-section	kA	3.3
Maximum permissible short-circuit current in core	kA	3.3
Permissible continuous current rating *		
• by aerial laying in trefoil formation	A	154
• by aerial flat laying	A	185
• by burial in trefoil formation	A	129
• by burial flat	A	134
Partial discharge factor for rated voltage, not more than	pC	6
Maximum permissible conductor temperature		
• Continuous	°C	+90
• in emergency operation	°C	+130
• at short circuit	°C	+250
Operating temperature range (in climate version NF)	°C	-50 ... +50
Operating temperature range (in climate version T)	°C	-25 ... +65
Minimum bending radius by laying	mm	528
Rated outer diameter of the cable (for reference) **	mm	33
Cable weight (approximate)	kg/km	1240
Rated factory cable length and gross weight of the delivery on the drums ***	m, t	# 18аУД-40: 1365 • 2.2

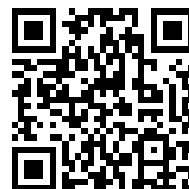

#### Notes:

When ordering it is necessary to agree the factory length of the product with the manufacturer

\* Long permissible current loads are calculated for the following conditions: conductor temperature 90 °C, air temperature 30 °C, soil temperature 20 °C, thermal resistivity of soil 1.5 °K·m/W, laying depth in the soil 0.8 m, while laying in flat formation the distance between cables in clear is equal to the cable diameter, while laying in trefoil formation cables are laid side by side, shields are earthed on both ends of the line

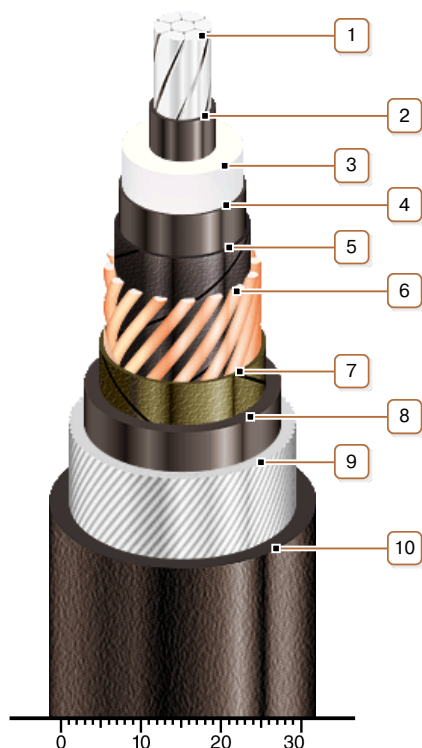

\*\* The external diameter may differ from the rated up to ± 10 %

\*\*\* Отклонение фактической массы брутто от указанного значения может составлять ± 7 %

## АПвЕАкВ-10 1х35 ТУ У 31.3-00214534-017-2003

Single-core power cables with aluminium conductor, with XLPE, aluminium-wire armoured, with PVC compound outer sheath

### CONSTRUCTION

**1. Aluminium multiwire compacted conductor**

*Note: It is possible to manufacture cable with sealed conductor.*

**2. Inner extruded semiconducting layer**

**3. XLPE insulation**

**4. Outer extruded semiconducting layer**

**5. Lapping layer of semiconductive swellable tape**

**6. Copper screen**

**7. Lapping layer of nonwoven cloth tape**

**8. Extruded bedding of polyethylene**

**9. Aluminium-wire armour**

**10. PVC compound outer sheath**
