АПвЭАкВнгд-6 1х630 ТУ У 31.3-00214534-017-2003

Single-core power cables with aluminium conductor, flame-retardant, with XLPE, aluminium-wire armoured, with PVC compound outer sheath, with low smoke and gas emission

Due to non-magnetic armour, cables operate at AC Technical cable requirements correspond to IEC 60502-2

Cables are used for laying:

- · in places, where small mechanical impacts on cable are possible, including tensile forces
- in premises, tunnels, ducts, mines, dry soil and outdoor under shelter
- · in bunches
- at sites, where low smoke and gas emission are required (NPP, subway, large industrial facilities, high-rise buildings, etc.)

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

АПвЭАкВнгд-6 1x630/35 (ОМ) ТУ У 31.3-00214534-017-2003

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

It is possible to manufacture cable with sealed conductor.

Order entry example:

АПвЭАкВнгд-6 1х630/35 (г) ТУ У 31.3-00214534-017-2003

Fire safety code in accordance with ДСТУ 4809:2007: ПБ122121000

Products of this mark meet the requirements:

- · single wire cable flame retardance
- bunched cable flame retardance category A
- toxicity class Tk2 of the combustion products of nonmetallic elements (toxicity index from 40 up to 120 g/m³)
- class ДТк1 on smoke-forming ability by smouldering of non-metallic elements (coefficient of smoke formation from 50 to 500 m²/kg)
- class ДΠκ2 on smoke-forming ability by combustion (minimum luminous flux more than 60 %)
- corrosive class Kκ1 of combustion products of non-metallic elements (the number of halogen hydrides less than 150 mg/g, pH less than 4.3, specific conductivity more than 10 μ S/mm)

АПвЭАкВнгд-6 1х630 ТУ У 31.3-00214534-017-2003

Single-core power cables with aluminium conductor, flame-retardant, with XLPE, aluminium-wire armoured, with PVC compound outer sheath, with low smoke and gas emission

TECHNICAL SPECIFICATIONS

Rated voltage	kV	6
Maximum voltage	kV	7.2
Number and rated area of conductors	mm²	1 x 630
Insulation thikness	mm	3.2
Minimum screen cross-section	mm²	35
Permissible short circuit current across the screen of	kA	7.1
minimum cross-section		
Maximum permissible short-circuit current in core	kA	59
Permissible continious current rating *		
by aerial laying in trefoil formation	Α	907
• by aerial flat laying	Α	1001
by burial in trefoil formation	Α	593
• by burial flat	Α	584
Partial discharge factor for rated voltage, not more than	рС	6
Maximum permissible conductor temperature		
Continious	°C	+90
in emergency operation	°C	+130
• at short circuit	°C	+250
Operating temperature range (in climate version NF)	°C	-50 +50
Operating temperature range (in climate version T)	°C	-25 +65
Minimum bending radius by laying	mm	928
Rated outer diameter of the cable (for reference) **	mm	58
Cable weight (approximate)	kg/km	4740
Rated factory cable length and gross weight of the delivery	m, t	# 22УД-60: 499 • 3.3
on the drums ***		# 25УД-90: 838 • 5.5

Notes:

When ordering it is neccesary to agree the factory length of the product with the manufacturer

^{*} Long permissible current loads are calculated for the following conditions: conductor temperature 90 °C, air temperature 30 °C, soil temperature 20 °C, thermal resistivity of soil 1.5 °K • m/W, laying depth in the soil 0.8 m, while laying in flat formation the distance between cables in clear is equal to the cable diameter, while laying in trefoil formation cables are laid side by side, shields are earthed on both ends of the line

^{**} The external diameter may differ from the rated up to \pm 10 %

^{***} Отклонение фактической массы брутто от указанного значения может составлять \pm 7 %

АПвЭАкВнгд-6 1x630 ТУ У 31.3-00214534-017-2003

Single-core power cables with aluminium conductor, flame-retardant, with XLPE, aluminium-wire armoured, with PVC compound outer sheath, with low smoke and gas emission

CONSTRUCTION

- 1. Aluminium multiwire compacted conductor
 Note: It is possible to manufacture cable with sealed conductor.
- 2. Inner extruded semiconducting layer
- 3. XLPE insulation
- 4. Outer extruded semiconducting layer
- 5. Lapping layer of semiconductive swellable tape
- 6. Copper screen
- 7. Lapping layer of nonwoven cloth tape
- 8. Extruded bedding of low fire-risk PVC compound
- 9. Aluminium-wire armour
- 10. Low fire-risk PVC compound outer sheath
