Single-core power cables with aluminium conductor, with XLPE, aluminium-wire armoured, with polyethylene outer sheath

---

For the cable of this mark correspond the foreign-made analogues:

Al/XLPE/CWS/PE/AWA/MDPE (GB) • XHAKXSAx (PL)

Due to non-magnetic armour, cables operate at AC

Technical cable requirements correspond to IEC 60502-2

---

Cables are used for laying:

- *in places, where small mechanical impacts on cable are possible, including tensile forces*
  - *in soil (trenches)*
  - *in the air, including cable structures, if provided the additional fire protection*
- 

It is possible to manufacture cables with extruded semiconductor layer along outer sheath.

Order entry example:

АПВЭАкП-П-15 1x70/16 ТУ У 31.3-00214534-017-2003

An extruded semiconductor layer along outer sheath ensures the correct testing of cable line with sections of underground laying in polymer pipes.

---

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

АПВЭАкП-15 1x70/16 (ОМ) ТУ У 31.3-00214534-017-2003

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.
