

## ПВЭВ-15 3x150 TY Y 31.3-00214534-017-2003

Power cables with copper conductors, with XLPE and with PVC compound outer sheath

For the cable of this mark correspond the foreign-made analogues:

N2XSEY (DE) • 2XSEY (DE) • Cu/XLPE/CWS/PVC (GB) • ПвВ (RU)

Technical cable requirements correspond to IEC 60502-2

Cables are used for laying:

- *in premises, tunnels, ducts, mines, dry soil and outdoor under shelter*
- *single laying*

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

ПВЭВ-15 3x150/25 (OM) TY Y 31.3-00214534-017-2003

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

It is possible to manufacture cable with sealed conductors.

Order entry example:

ПВЭВ-15 3x150/25 (r) TY Y 31.3-00214534-017-2003

Fire safety code in accordance with ДСТУ 4809:2007: ПБ100000000

Products of this mark meet the requirements:

- *single wire cable flame retardance*

### TECHNICAL SPECIFICATIONS

|  |                 |  |
|--|-----------------|--|
| Rated voltage  | kV              | 15   |
| Maximum voltage  | kV              | 17.5   |
| Number and rated area of conductors  | mm <sup>2</sup> | 3 x 150                                      |
| Insulation thickness   | mm              | 4.5  |
| Minimum screen cross-section   | mm <sup>2</sup> | 25   |
| Permissible short circuit current across the screen of minimum cross-section | kA              | 5.1  |
| Maximum permissible short-circuit current in core                            | kA              | 21.5   |
| Permissible continuous current rating *                                      |                 |  |
| • <i>by aerial laying</i>  | A               | 398  |
| • <i>by burial</i>   | A               | 334  |
| Partial discharge factor for rated voltage, not more than                    | pC              | 6  |
| Maximum permissible conductor temperature                                    |                 |  |
| • <i>Continuous</i>  | °C              | +90  |
| • <i>in emergency operation</i>  | °C              | +130   |
| • <i>at short circuit</i>  | °C              | +250   |
| Operating temperature range (in climate version NF)                          | °C              | -50 ... +50                                  |
| Operating temperature range (in climate version T)                           | °C              | -25 ... +65                                  |
| Minimum bending radius by laying   | mm              | 1040   |
| Rated outer diameter of the cable (for reference) **                         | mm              | 65   |
| Cable weight (approximate)   | kg/km           | 7460   |
| Rated factory cable length and gross weight of the delivery on the drums     | m, t            | # 22УД-60: 363 • 3.6<br># 25УД-90: 643 • 6.4 |

Notes:

When ordering it is necessary to agree the factory length of the product with the manufacturer

\* Long permissible current loads are calculated for the following conditions: conductor temperature 90 °C, air temperature 30 °C, soil temperature 20 °C, load factor 1.0, thermal resistivity of soil 1.5 °K•m/W, laying depth in the ground 0.8 m, shields are grounded at both ends of the line

\*\* The external diameter may differ from the rated up to ± 10 %

**ПВЭВ-15 3x150**  
**ТУ У 31.3-00214534-017-2003**

Power cables with copper conductors, with XLPE and with PVC compound outer sheath

**CONSTRUCTION**

- 1. Copper multiwire compact conductor**  
*Note: It is possible to manufacture cable with sealed conductors.*
- 2. Inner extruded semiconducting layer**
- 3. XLPE insulation**
- 4. Outer extruded semiconducting layer**
- 5. Lapping layer of semiconductive swellable tape**
- 6. Copper screen**
- 7. PVC compound outer sheath**

*Note: Conductor twisting is not illustrated*
