

## **ПвЭКПы-30 3x150 ТУ У 31.3-00214534-017-2003**

Three-core power cables with copper conductors, with XLPE, steel-wire armoured, with strengthened polyethylene outer sheath

---

Technical cable requirements correspond to IEC 60502-2

---

Cables are used for laying:

- *in places, where mechanical impacts on cable are possible, including tensile forces*
  - *in soil (trenches)*
  - *on difficult route sections, according to the unique specification*
  - *in the air, including cable structures, if provided the additional fire protection*
- 

It is possible to manufacture cables with extruded semiconductor layer along outer sheath.

Order entry example:

ПвЭКПы-П-30 3x150/25 ТУ У 31.3-00214534-017-2003

An extruded semiconductor layer along outer sheath ensures the correct testing of cable line with sections of underground laying in polymer pipes.

---

It is possible to manufacture cables with an integrated fiber-optic module.

Order entry example:

ПвЭКПы-30 3x150/25 (OM) ТУ У 31.3-00214534-017-2003

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

---

It is possible to manufacture cable with sealed conductors.

Order entry example:
