ПвЭВнг-60 1x120 ТУ У 31.3-00214534-060:2011

Power cables with copper conductor, flame-retardant, with XLPE and PVC compound outer sheath

For the cable of this mark correspond the foreign-made analogues: $\Pi_BB_{H\Gamma}(B)$ (RU) \cdot $\Pi_BB_{H\Gamma}(A)$ (RU) Technical cable requirements correspond to IEC 60840

Cables are used for laying:

- in premises, tunnels, ducts, mines, dry soil and outdoor under shelter
- in bunches

It is possible to manufacture cables with an integrated fiber-optic module. Order entry example: ПвЭВнг-60 1x120/95 (ОМ) ТУ У 31.3-00214534-060:2011

In conjunction with the DTS system, the integrated fiber-optic module can act as a distributed cable line temperature sensor.

It is possible to manufacture cable with sealed conductor. Order entry example: $\Pi B \Im B_{H\Gamma}$ -60 1x120/95 (r) TY Y 31.3-00214534-060:2011

Fire safety code in accordance with ДСТУ 4809:2007: ПБ130000000 Products of this mark meet the requirements:

• single wire cable flame retardance

bunched cable flame retardance category B

Notes:

When ordering it is neccesary to agree the factory length of the product with the manufacturer

* Long permissible current loads are calculated for the following conditions: conductor temperature 90 °C, air temperature 30 °C, soil temperature 20 °C, load factor 1.0, thermal resistivity of soil 1.0 $\% \cdot m/W$, laying depth in the ground 1.5 m, while laying in flat formation the distance between cables in clear is equal to the cable diameter, while laying in trefoil formation cables are laid side by side ** The external diameter may differ from the rated up to $\pm 10 \%$

*** Отклонение фактической массы брутто от указанного значения может составлять ± 7 %

ПвЭВнг-60 1x120 ТУ У 31.3-00214534-060:2011

Power cables with copper conductor, flame-retardant, with XLPE and PVC compound outer sheath

CONSTRUCTION

- 1. Copper multiwire compact conductor Note: It is possible to manufacture cable with sealed conductor.
- 2. Inner extruded semiconducting layer
- 3. XLPE insulation
- 4. Outer extruded semiconducting layer
- 5. Lapping layer of semiconductive swellable tape

6. Copper screen

Note: It is possible to manufacture a cable with a fiber optic module built into the screen, including as a DTS system sensor

- 7. Lapping layer of glass tape
- 8. Low flammable PVC compound outer sheath
