

## АВБбШнгд 4х2.5 (ож)-1 ТУ У 31.3-00214534-018-2003

Power cables with aluminium conductors, with low-flammable PVC-compound insulation, galvanized steel-tape armoured, with PVC-compound protection hose

Cables are used for laying:

- in bunches
- in premises, dry ducts and tunnels, in corrosive environment
- in places, where small mechanical impacts on cable are possible, including tensile forces
- in bunches, in crowded places

Fire safety code in accordance with ДСТУ 4809:2007: ПБ123121000

Products of this mark meet the requirements:

- single wire cable flame retardance
- bunched cable flame retardance category A
- toxicity class Tk3 of the combustion products of nonmetallic elements (toxicity index over 120 g/m<sup>3</sup>)
- class ДТк1 on smoke-forming ability by smouldering of non-metallic elements (coefficient of smoke formation from 50 to 500 m<sup>2</sup>/kg)
- class ДПк2 on smoke-forming ability by combustion (minimum luminous flux more than 60 %)
- corrosive class Kk1 of combustion products of non-metallic elements (the number of halogen hydrides less than 150 mg/g, pH less than 4.3, specific conductivity more than 10 μS/mm)

### TECHNICAL SPECIFICATIONS

|                                                                          |                 |                  |
|--------------------------------------------------------------------------|-----------------|------------------|
| Rated voltage                                                            | kV              | 1                |
| Number and rated area of conductors                                      | mm <sup>2</sup> | 4 x 2.5          |
| Phase insulation thickness                                               | mm              | 0.8              |
| Permissible continuous current rating (AC of industrial frequency) *     |                 |                  |
| • by aerial laying                                                       | A               | 19               |
| • by burial                                                              | A               | 26               |
| Maximum permissible conductor temperature                                |                 |                  |
| • Continuous                                                             | °C              | +70              |
| • in emergency operation                                                 | °C              | +80              |
| • at short circuit                                                       | °C              | +130             |
| Operating temperature range                                              | °C              | -50 ... +50      |
| Minimum bending radius by laying                                         | mm              | 127.5            |
| Rated outer diameter of the cable (for reference) **                     | mm              | 17               |
| Cable weight (approximate)                                               | kg/km           | 440              |
| Rated factory cable length and gross weight of the delivery on the drums | m, t            | # 12: 1130 • 0.6 |

Notes:

When ordering it is necessary to agree the factory length of the product with the manufacturer

\* Long permissible current loads are calculated during operation in four-wire networks with load in all the conductors for the following conditions: air temperature plus 25 °C, soil temperature plus 15 °C, thermal resistivity of soil 1.2 °K·m/W, laying depth in the soil 0.7 m

\*\* The external diameter may differ from the rated up to ± 10 %

## АВБбШнгд 4х2.5 (ож)-1 ТУ У 31.3-00214534-018-2003

Power cables with aluminium conductors, with low-flammable PVC-compound insulation, galvanized steel-tape armoured, with PVC-compound protection hose

### CONSTRUCTION

1. Aluminium conductor
2. Low fire-risk PVC compound insulation
3. Low fire-risk PVC-compound inner sheath
4. Double galvanized steel-tape armour
5. Pressed off low fire-risk PVC compound protection hose

*Note: Conductor twisting is not illustrated*
