

BKB 4x10-1 TY Y 31.3-00214534-016-2003

Power cables with copper conductors, with PVC-compound insulation, galvanized steel-wire armoured, with PVC-compound outer sheath

Cables are used for laying:

- *single laying*
- *in premises, dry ducts and tunnels, in corrosive environment*
- *in places, where intense tensile forces are possible (in cable lifting, in bulk, heaving, boggy, everfrost soils)*

Manufacturing of cables with a different number and different design of conductors is possible

Manufacturing of single-phase cables with aluminium-wire armour is possible

Fire safety code in accordance with ДСТУ 4809:2007: ПБ100000000

Products of this mark meet the requirements:

- *single wire cable flame retardance*

TECHNICAL SPECIFICATIONS

Rated voltage	kV	1
Number and rated area of conductors	mm ²	4 x 10
Phase insulation thickness	mm	1
Armor wire diameter	mm	1.4
Permissible continious current rating (AC of industrial frequency) *		
• <i>by aerial laying</i>	A	58
• <i>by burial</i>	A	73
Maximum permissible conductor temperature		
• <i>Continuous</i>	°C	+70
• <i>at short circuit</i>	°C	+160
Operating temperature range	°C	-50 ... +50
Minimum bending radius by laying	mm	138
Rated outer diameter of the cable (for reference) **	mm	23
Cable weight (approximate)	kg/km	1230
Rated factory cable length and gross weight of the delivery on the drums ***	m, t	# 14: 1090 • 1.5

Notes:

When ordering it is neccesary to agree the factory length of the product with the manufacturer

* Long permissible current loads are calculated during operation in four-wire networks with load in all the conductors for the following conditions: air temperature plus 25 °C, soil temperature plus 15 °C, thermal resistivity of soil 1.2 °K·m/W, laying depth in the soil 0.7 m

** The external diameter may differ from the rated up to ± 10 %

BKB 4x10-1 **TY Y 31.3-00214534-016-2003**

Power cables with copper conductors, with PVC-compound insulation, galvanized steel-wire armoured, with PVC-compound outer sheath

CONSTRUCTION

1. Copper conductor
2. PVC compound insulation
3. PET film winding
4. PVC compound belt insulation
5. Round galvanized steel-wire armour
6. Lapping layer of nonwoven cloth tape
7. PVC compound outer sheath

Note: Manufacturing of single-phase cables with aluminium-wire armour is possible

Note: Conductor twisting is not illustrated
