Self-supporting wires with light-stabilized cross-linked polyethylene insulation, with neutral carrier insulated conductor

Used for laying:

• trunks of aerial electric power lines and line branches for the rated voltage of 0.6/1 kV

• in air, types II and III according to FOCT 15150-69, including on sea coasts, salt lakes, in industrial areas and areas of saline sands

It is possible to manufacture the wire with longitudinal core sealing by water-blocking materials
