Self-supporting wires with light-stabilized cross-linked polyethylene insulation

Used for laying:

aerial electric power lines for the rated voltage of 0.6/1 kV

• branches from aerial electric power lines for the rated voltage of 0.6/1 kV to the input and for the laying on the walls of buildings and engineering structures

• in air, types II and III according to FOCT 15150-69

It is possible to manufacture the wire with longitudinal core sealing by water-blocking materials
