Single-core self-supporting high-voltage wires with light-stabilized cross-linked polyethylene insulation

Used for laying:

aerial electric power lines for the rated voltage from 10 kV till 35 kV

• in air, types II and III according to FOCT 15150-69, including on sea coasts, salt lakes, in industrial areas and areas of saline sands

It is possible to manufacture the wire with longitudinal core sealing by water-blocking materials
