Single-core self-supporting high-voltage flame-retardant wires with polymer compound insulation

Used for laying:

- aerial electric power lines for the rated voltage from 10 kV till 35 kV
- in air, types II and III according to ГОСТ 15150-69, including on sea coasts, salt lakes, in industrial areas and areas of saline sands

It is possible to manufacture the wire with longitudinal core sealing by water-blocking materials

Fire safety code in accordance with ДСТУ 4809:2007: ПБ100000000

Products of this mark meet the requirements:

- single wire cable flame retardance
