ТУ 16-505.733-78

Winding wires for submersible motors, with double-layer high and low-density polyethylene insulation

Designed for operation at temperature up to 80 °C

TECHNICAL SPECIFICATIONS:

Conductor diameter	mm	0.4 ... 6.25
Diametric insulation thickness	mm	0.45 ... 0.75
Operating temperature range	°C	-60 ... +80

CONSTRUCTION:

1. Copper multiwire conductor
2. Low-density polyethylene insulation
3. High-density polyethylene insulation
