

## **МБ1** **TY Y 27.4-00214534-062:2008**

Copper rod for wire and nonferrous rolled products for electrical purposes

Manufacturing of rod with diameter 8, 12.7, 16, 18 and 20 mm is possible

### **TECHNICAL SPECIFICATIONS**

|                                       |                              |               |
|---------------------------------------|------------------------------|---------------|
| Nominal diameter                      | mm                           | 8 ... 20      |
| Electrical resistivity, not more than | mkOhm · m                    | 0.01718       |
| Elongation at break, not less than    | %                            | 38            |
| Rupture strength, no less than        | MPa<br>(kg/mm <sup>2</sup> ) | 160<br>(16.3) |
