## КМПвЭВЭнгд-FR 37x1

ТУ У 27.3-00214534-084:2016
Fire resistant compact cables with copper conductors, XLPE-insulated, sheathed with low risk-of-fire PVC composition, with screened cores and collective screen

For the cable of this mark correspond the foreign-made analogues:
КМПвЭВЭнг-FRLS (RU)
Used:

- for the installation of control circuits, alarm system, communications, interinstrument connections operating at AC voltage of 500 V or 1000 V with frequency no more than 200 kHz , or at a constant voltage of 750 V or 1000 V, respectively
- for multi-cable installation (acc. GOST 31565:2012) in cable channels and premises of internal electrical installations, including nuclear power stations (NPS) outside the under containment zone
- for use in systems having security class 2(A), 3(B), 3(C), and 4 according to the classification of $\mathrm{H} \Pi$ 306.2.141-2008 and НП 306.2.202-2015
- for cable lines of nuclear power stations security systems equipment, electrical wiring circuits of fire safety systems (fire alarm circuits, power supply of fire fighting pumps, lighting of emergency exits and escape routes, smoke removal and ventilation systems, evacuation elevators)
- for wirings for the operating departments of hospitals, emergency electric power supply circuits for equipment (current collectors), which operates in case of fire

Fire safety code in accordance with ДСТУ 4809:2007: ПБ123121080
Products of this mark meet the requirements:

- single wire cable flame retardance
- bunched cable flame retardance category A
- toxicity class Tk3 of the combustion products of nonmetallic elements (toxicity index over $120 \mathrm{~g} / \mathrm{m}^{3}$ )
- class ДТк1 on smoke-forming ability by smouldering of non-metallic elements (coefficient of smoke formation from 50 to $500 \mathrm{~m}^{2} / \mathrm{kg}$ )
- class ДПк2 on smoke-forming ability by combustion (minimum luminous flux more than $60 \%$ )
- corrosive class КК1 of combustion products of non-metallic elements (the number of halogen hydrides less than $150 \mathrm{mg} / \mathrm{g}$, pH less than 4.3, specific conductivity more than $10 \mu \mathrm{~S} / \mathrm{mm}$ )
- flame-resistant class FE180 under fire conditions with a temperature not less than $750{ }^{\circ} \mathrm{C}$

PRODUCTION GUIDE

## TECHNICAL SPECIFICATIONS

| Rated AC voltage of no more than 200 kHz | V | $500 ; 1000$ |
| :--- | :---: | :--- |
| Rated DC voltage | V | $750 ; 1000$ |
| Number and rated diameter of conductors | $\mathrm{mm}^{2}$ | $37 \times 1$ |
| Operating temperature range | ${ }^{\circ} \mathrm{C}$ | $-50 \ldots+60$ |
| Permissible continious conductors temperature | ${ }^{\circ} \mathrm{C}$ | +90 |
| Minimum bending radius by laying | mm | 207 |
| Cable outer diameter (for reference only) ${ }^{\star *}$ | mm | 34.4 |
| Cable weight (approximate) | $\mathrm{kg} / \mathrm{km}$ | 1946 |

Notes:
Cables with shielded core pairs, with the number of pairs of 16, 19 or 37 can also be manufactured
When ordering it is neccesary to agree the factory length of the product with the manufacturer
** The external diameter may differ from the rated up to $\pm 10 \%$

## CONSTRUCTION

1. Copper multiwire conductor
2. Fire-resistant barrier
3. XLPE insulation
4. Insulation screen - tinned copper or copper wires braid
5. Wrapping the core with glass tape or mica glass tape
6. Low fire-risk PVC-compound inner sheath
7. Collective screen - tinned copper or copper wires braid
