### Cables are used for:

- laying in soils of all groups, including soils with low, medium and high corrosion activity, and in the areas contaminated by rodents, except for soils subjected to cryosolic and other distortions, as well as in cable ducts, blocks, etc.
- in areas with exclusive fire safety requirements

Fire safety code in accordance with ДСТУ 4809:2007: ПБ130122000

Products of this mark meet the requirements:

- · single wire cable flame retardance
- · bunched cable flame retardance category B
- class  $\pred{\mathcal{J}}$ T $\kappa$ 1 on smoke-forming ability by smouldering of non-metallic elements (coefficient of smoke formation from 50 to 500 m²/kg)
- class ДПк2 on smoke-forming ability by combustion (minimum luminous flux more than 60 %)
- corrosive class  $K\kappa 2$  of combustion products of non-metallic elements (the number of halogen hydrides less than 150 mg/g, pH more than 4.3, specific conductivity less than 10  $\mu$ S/mm)
